📍 Ahmedabad

EDUCATION

Lok Jagruity University

Bachelor of Engineering

Sep 2024 - Sep 2028

SKILLS

Programming Languages : Java , Python , Javascript , DS , DBMS

Frameworks : Bootstrap , Tailwind , Pandas , Numpy , Streamlit

Tools : Github , Vercel ,VS Code,Jupyter,Kiro,Canva

WORK EXPERIENCE

Fresher - Ready to Start My Journey

Eager to Begin my professional career and contribute to innovative projects. Looking forward to learning from experienced developers and applying my skills in real-world scenarios. Development Roles | Web Designer

PROJECTS

Joyspoon(A Mukhwas E-commerce Website) :

Developed a premium mukhwas (mouth freshener) e-commerce website named “Joyspoon” using HTML, CSS, and JavaScript, focusing on a clean and modern user interface with responsive design for seamless experience across devices. Implemented interactive features such as product listings, dynamic UI elements, and smooth navigation to enhance user engagement. Designed the website with an emphasis on branding, showcasing premium products with attractive visuals and structured layouts. Successfully deployed the project, demonstrating practical knowledge of front-end development, user experience design, and real-world project execution.

BRTS Ticket Booking System :

Developed a Python-based “BRTS Ticket Booking System” using Streamlit, designed to simulate a real-time public transport ticketing platform. The application features ticket booking between stations, a dynamic dashboard displaying total bookings, tickets, and user expenditure, and a secure database integration to store user information, ticket records, and station details. Implemented email verification using OTP for enhanced user authentication and security. The system provides an interactive and user-friendly interface, allowing users to track their spending and booking history. This project demonstrates strong skills in Python, database management, authentication mechanisms, and full-stack application development using Streamlit.
